1. Color availability may vary by region.

2. The data is provided by HONOR labs, the actual size, weight may vary based on the configuration, manufacturing process, and measurement method. The thickness of the phone does not include the raised part of the camera.

3. With a rounded corners design on the display, the diagonal length of the exterior screen is 6.8 inches when measured according to the standard rectangle (the actual viewable area is slightly smaller).

4. The screen supports a maximum refresh rate of 120Hz, and the refresh rate may be varied slightly under different app interfaces and game image quality. Please refer to your actual experience.

5. The resolution measured as a standard rectangle; thus, the effective pixels are slightly less.

6. The screen supports a maximum high-frequency PWM dimming of 4320Hz, which takes effect in low-brightness scenarios. Please refer to the actual experience. The phone is not medical equipment and is not available for treatment.

7. This is not a waterproof mobile phone. It is splash-resistance, water-resistance, and dust-resistance under normal use. It reaches the IP68 level the IEC 60529 standards under testing in controlled laboratory conditions. Splash, water and dust resistance are not permanent, and protection may be reduced by daily wear and tear. Do not charge the phone when it is wet. See the user guide for cleaning and drying instructions. Damage due to immersion in liquids is not covered under warranty.

8. The actual storage varies with the configuration. The available internal storage may be smaller as part of the internal storage is occupied by software
